RIGID INSULATION

DOW CHEMICAL
1-4 Inch Sheets
25, 40, 60, 100 Density

STYROFOAM™ Brand Insulation resists moisture infiltration and condensation, reduces heat loss or gain, has excellent thermal performance, is lightweight and easy to handle

Agricultural building applications, Residential above and below grade applications, Commercial above and below grade applications, New construction, Reconstruction and retrofitting Transportation, Refrigeration, Walk-in coolers and refrigerated warehouses, Garages and panels

CONCRETE FORMLINERS

Formliners allow for a variety of concrete textures to be produced for cast in place, precast, and tilt up applications. Formliners are available in a range of grades to economically cast an architectural finish.

UNI-CAST, MULTI-CAST
DURA-CAST, ULTRA-CAST

STAY-FORM

Stay in Place Concrete Forms

Reduces Labor Cost, No Stripping Costs, Lightweight Sheets, Easy Rebar and Conduit Penetrations

Expanded Mesh between Solid Ribs
11.9 Lbs per Sheet, #66-26 Gauge, 27" Wide x 96" Long

Uses: Bulkheads, Grade Beams, Blindside Walls, Bridges, Pile Caps, Shotcrete

Works great with Symons Steel-ply and Rebar in a One Sided Forming Application!

GOEDECKE

CONSTRUCTION EQUIPMENT & SUPPLIES

Building Value Through Long-Term Relationships, Supplying Service & Delivering Solutions on your Current & Future Projects

CONCRETE FORMWORK ACCESSORIES

FORMWORK TIES

Goedecke offers a complete line of ties and forming accessories to fill all forming needs, from the Loop tie to the Flat tie, there is a size to fit all your project requirements

Loop Ties, Snap Ties, Coil Ties, Bent Ties, Flat Ties, S-Panel Ties, Gang Form Ties, S-Base Ties, Threaded Ties, Toggle Ties , Single and Double Pilaster Ties, Spandrel Ties, Cone Ties, Strongback Ties, Combination Ties (LC6)
Snap Ties (Long End, Short End, Cones, Washers)

FORMING & SHORING DESIGN

CAPABILITIES: FORMING. SHORING. SCAFFOLDING.

Symons Steel-Ply, Sym-Ply Clamp forms, Alis-Ply Heavy Clamp forms (straight and circular), Max-A-Form STS plate Girder forms, Flex-Form Circular forms, Aluminum Beam Gang, Column Forms (circular or rectangular), Bridge decking, Versiform, Parapet forms, Logix Insulated Concrete Forms (ICF), Symons Soldier (post shores, beams and braces), Pipe Bracing for stand alone walls and backfilled walls, Shore-Fast Aluminum shoring, Post Shores, Roller Deck, Garage Beam System, Room Tunnel, Space Lift, High-Capacity Shoring. Peri-Up System Scaffolding, Tube & Clamp Scaffolding, and Frame/Mason Panel Scaffolding, Biljax/Baker Scaffolding, and Stages.

WATERSTOPS

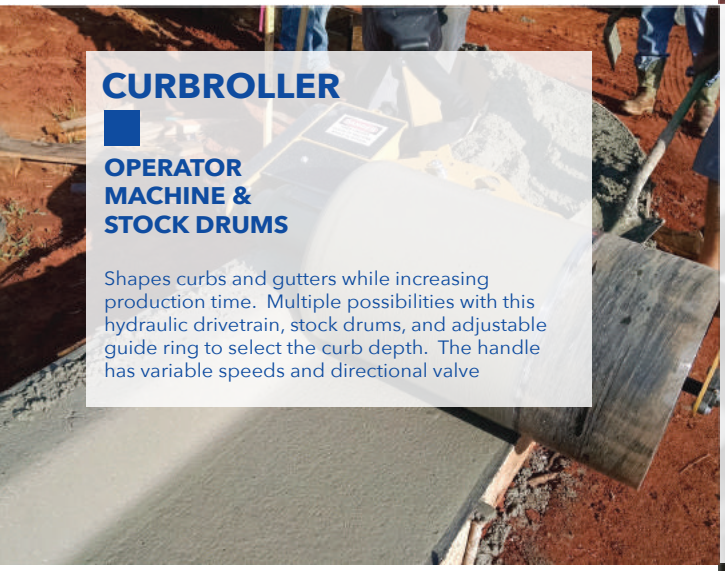
PVC WATERSTOP

Polyvinylchloride Waterstops offer outstanding physical properties, excellent inherent elasticity and resistance to many waterborne chemicals

SWELLSTOP

A highly versatile strip-applied waterstop for non-moving concrete joints

URETHANE



CURBROLLER

OPERATOR MACHINE & STOCK DRUMS

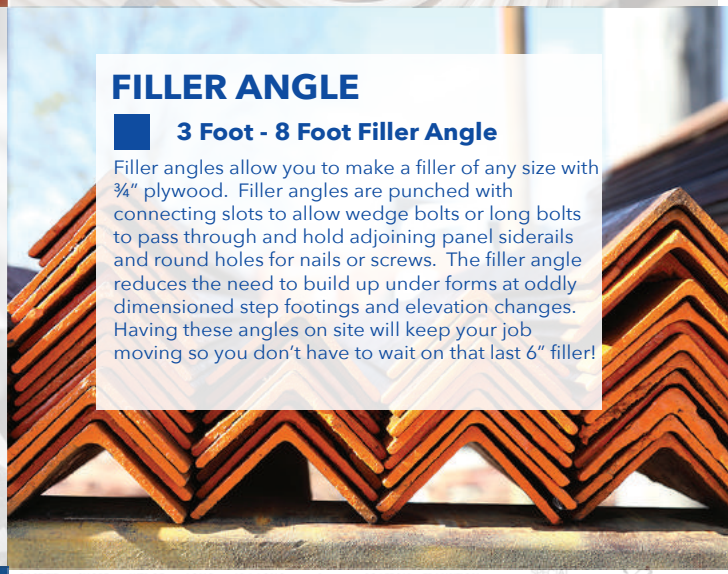
Shapes curbs and gutters while increasing production time. Multiple possibilities with this hydraulic drivetrain, stock drums, and adjustable guide ring to select the curb depth. The handle has variable speeds and directional valve

CHAMFERS

Chamfer strips are used in construction forms, creating a chamfered edge at the concrete corners.

Wood Chamfers
1/2 Inch to 1 1/2 Inch
Provide smooth, straight lines in concrete casts

PVC Flexible Chamfers
Reusable, prevents leakage and eliminates rubbing or stoning
Can be formed for radius applications



FILLER ANGLE

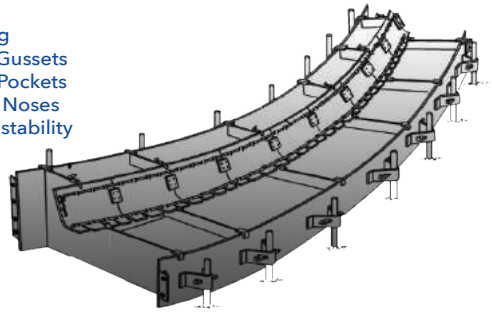
3 Foot - 8 Foot Filler Angle

Filler angles allow you to make a filler of any size with ¾" plywood. Filler angles are punched with connecting slots to allow wedge bolts or long bolts to pass through and hold adjoining panel siderails and round holes for nails or screws. The filler angle reduces the need to build up under forms at oddly dimensioned step footings and elevation changes. Having these angles on site will keep your job moving so you don't have to wait on that last 6" filler!

CURB FORMS

Gutter forming systems available in 4" and 6". The systems are made up of a back form, a front form, a face form, and a division plate and a top spreader.

Self-Aligning
Reinforced Gussets
Steel Stake Pockets
Heavy-Duty Noses
Height Adjustability



FORM OIL

Form Releases
To break the bon between the form and the concrete apply reactive form releases to the form

Magic Kote
Effectively prevents bonding of concrete to forms and formliners. Chemically releasese harded concrete from steel, aluminum, plywood, and composition forms

ATTACHMENT HARDWARE

Turnbuckle Aligners
Straight Plate, Bent Plate, Attachment Plates, Pipeform, Corewall, Ratchet

Waler Attachment
One Piece Waler Clamps, Z Tie Holder and 2x4 Waler Ties (2 pc), Plylag or Gang Waler Rods and Gang Waler Plates and Nuts

Strongback Attachement
J-Strongback Hooks for Double Vertical 2x6 (hold vertical alignment members placed at 90 degrees to the horizontal walers to keep forms aligned vertically)

Bolts
Wedge bolts, Long Bolts (for steel fillers), Adjustable long bolts, Short bolts, Base tie bolts, Speed bolts, Contour bolts, Coil bolts, Gangform bolts

Walkway
Scaffold Brackets, Osha Approved Walkboards, Stages, Sureguard brackets

Lifting
Double Duty lifting brackets, Waler lift brackets

Steel Nail Stakes
