

# SPRAYMATRIX™

## FIBER REINFORCED MATRIX

**GOEDECKE**  
CONSTRUCTION EQUIPMENT AND SUPPLIES  
goedeckeonline.com

*solve unique erosion control  
and revegetation challenges*

SprayMatrix saves time and labor when combined with seed, fertilizer and soil amendments, by eliminating excess site preparation with its simple One-Step Application.

Engineered fibers link together, forming a strong interwoven network, ensuring a more consistent and flexible bond for improved strength, durability, and water retention with lasting performance.

SprayMatrix is a high performance hydraulically applied Fiber Reinforced Matrix (FRM) comprised of thermomechanically processed virgin wood fiber and engineered reinforcing fibers. It comes premixed with a proprietary blend of cross-linked bonding agents and does not require additional binders or other additives to provide superior erosion control. SprayMatrix instantly adheres to the soil providing immediate protection that increases in effectiveness the longer it cures. SprayMatrix provides a functional and economical alternative to more expensive materials. It gets vegetation off to a faster, stronger start by maximizing water and nutrient retention while having the durability to ensure sustainable growth.
